

Preparing a home for TransACT fibre-to-the-home services

TransACT's state-of-the-art, fibre-to-the-home technology (FTTH) will provide residents with access to broadband speeds of up to 30Mbps*, as well as phone and subscription television services, including TransACT's unique entertainment-on-demand content.

Due to the unique nature of FTTH technology it is important that you and your builder understand how to make the most of the unparalleled broadband performance.

Because the fibre runs directly to your house, it is possible to have multiple ports for your phone, broadband and television services around your home. If your home is wired with a structured wiring scheme you will have more flexibility to accommodate a number of ports for various services in the rooms of your choice.

Prior to construction, talk to your builder or a licensed electrician about designing a structured wiring scheme for your home. See following for a checklist to run through with your builder.

TransACT consultants have been working closely with builders during the construction of the FTTH network. Detailed documentation is available to ensure builders understand how to make the most of TransACT's services while your home is being constructed.

TransACT will be responsible for running the fibre-cable to the wall of homes in Forde and Franklin Stages 2 and 3. We will also provide an electronics unit that is mounted on the side of your house.

You and your builder are responsible for the wiring of your home. Make sure you talk to your builder about the following.

- Internal and external conduit to run the TransACT cable.
- External cabinet to house the TransACT electronics unit (similar to an electrical fuse box).
- A location for your internal telecommunications wiring closet.
- Locations for the outlets to deliver the services (phone, broadband and television).

All of the above information is outlined in detail in TransACT's *Home wiring recommendations* document which is available from www.transact.com.au

Talk to your builder about getting your home ready for TransACT. For more information call TransACT on 13 30 61.
