TransACT
Everytime.

Phone and broadband from only \$54.95 per month*

TransACT's Skydata network provides great value phone and broadband services via canopy wireless technology. This involves a wireless signal transmitting from a radio tower to a receiver on your rooftop through to a fixed port in your home.

This service is available to selected customers in Amaroo, Charnwood, Dunlop, Franklin, Gungahlin, Harrison, Ngunnawal, Nicholls and Palmerston.

TalkWEB

\$54.95 per month*

TransTALK AllTime phone plan

Up to 5Mbps download/1Mbps upload broadband connection

Minimum total cost on a 12-month contract including \$299 connection fee is \$958.40.

TransTALK AllTime phone service

TransTALK is a full phone service providing your local, long distance and international calls. On the Skydata network your TransTALK phone service is provided via Voice over Internet Protocol (VoIP), this means it is delivered over the internet rather than the traditional copper wire.

Benefits include:

- free local calls to other TransACT phone customers[†]
- talk to anyone in Australia and pay only \$1.75 for the first hour or \$2.50 for two hours
- 37 cents per minute for calls to mobile phones anywhere in Australia
- great international call rates available to every international destination
- caller-number display and caller-number display blocking.

TransWEB broadband connection

- Surf the net faster and do more with your time online.
- Download large files in a fraction of the time compared to a dial-up connection.
- Talk on the phone and surf the net at the same time.
- Choose from our range of competitively-priced internet service providers (ISPs).
- Free technical support*.

Choose your ISP

TransWEB provides a connection to the TransACT network, allowing you to receive a broadband service. To connect to the internet you'll need to choose an ISP on the TransACT network. ISP charges are not included in your monthly TalkWEB fees. Grapevine, TransACT and ActewAGL's very own ISP, has a number of plans to suit your needs. Visit www.grapevine.com.au for more information.

TransACT
Everytime.

Standard Form of Agreement - Skydata, 12-month minimum contract and connection charges apply. Early cancellation fee of \$200 applies. All prices are GST inclusive. TalkWEB skydata network service is only available in selected areas to homes that cannot access TransACT cabled, fibre-to-the-home or ADSL2+ services. For technical reasons not all homes can be connected. The TransACT Skydata network uses shared wireless technology consisting of several access points (cells) on multiple towers and is a fixed wireless system with low latency. It is the nature of wireless that speeds may vary depending on atmospheric and environmental conditions. TransACT configures customers to achieve speeds up to 5Mbps with typical speeds ranging from 1Mbps to 5Mbps. The exact speed achieved at any given time will depend on a number of factors including the number of users on the cell, the conditions imposed by the selected ISP, hardware and software, internet traffic and the source of the download. National calls exclude calls to special services, operator-assisted services, telecard calls, data calls and calls made to the Christmas Islands, Cocos Islands and Norfolk Island. Timed calls are billed at 1-second increments, 1-second minimum with a 39-cent connection fee. *Call and ISP charges are additional where appropriate. †Free local calls are those made to customers on the TransTALK and/or TransBIZ plans. ‡Technical support is limited to TransACT products and services. Does not include ISP-related issues. On-site technical support not available.

Please note, due to TransTALK running on a Skydata network, TransACT does not recommend this product to customers who rely on a dial back device such as medical alert or other health monitoring devices, as the device will not be able to dial out in the event of a power outage.
